

WEKIVA TERRACE

SEPTEMBER 2026, VOLUME 125

September 22

On September 11, 2001, four jet planes were hijacked. The hijackers then deliberately flew three of the planes into the New York World Trade Centre and the Pentagon in Arlington, Virginia, causing the deaths of 2,983 people. The fourth plane (United Airlines Flight 93) was directed at Washington DC, but its passengers bravely attempted to take back control and it crashed into a field near Shanksville, Pennsylvania. These attacks, because of the loss of life and damage caused, form the biggest act of terrorism ever on United States soil.

The attacks did not only have an immense economic impact on the United States but additionally brought increased attention to national security. This has had huge implications for United States national and international politics (particularly for the relationships between the United States and Islamic countries in the Middle East).

September 13

The Apopka Fire Department and Apopka Police Department invite you to attend this year's 9/11 Memorial Ceremony. We will honor and remember those who perished in the terrorist attacks on September 11, 2001.

2026 ATLANTIC HURRICANE SEASON OUTLOOK

- Colorado State University scientists have further reduced their forecast for the 2026 Atlantic hurricane season and now expect activity to be well below normal.

Key Factors

- Moderate El Niño conditions are likely to strengthen over the next few months, with a strong El Niño potentially developing by the peak of hurricane season.
- Sea surface temperatures across the Caribbean and tropical Atlantic are near their long-term averages.
- El Niño is expected to be the dominant influence, producing high levels of vertical wind shear across the tropical Atlantic and suppressing hurricane development.

Landfall Risk

We forecast a well below-average probability of major hurricane landfalls along the continental United States coastline and across the Caribbean.

Preparedness Reminder

- Even in a quiet season, a single landfalling hurricane can have severe consequences. Coastal residents should prepare thoroughly every year, regardless of the seasonal forecast.
- (as of 8 July 2026)

MARK YOUR CALENDAR!

The annual HOA meeting is
scheduled for Wednesday, November
11...

PLEASE plan to attend! It is very
important for the HOA to be able to
conduct the business of the
neighborhood and **WE NEED YOU!**

The meeting will be held at the Vista
CAM office located at 323 Circle
Drive, Maitland.

It will start at 6:30 p.m. and should
last about an hour.

Decisions need to be made, and we
need **YOU** to help with those
decisions!

Thank you!
